

Dear Valued Customer,

In 2022, Littelfuse completed the acquisition of C&K related products. Since that time, Littelfuse have been and will continue to work hard to ensure this integration of C&K to Littelfuse is as easy as possible for you.

Beginning **April 28, 2025**, C&K Switches business processes will be implemented into Littelfuse SAP. The SAP implementation does include all C&K related products.

Littelfuse and Rutronik ensure that the EDI and labeling requirements are fully recorded and correctly transferred to the new system.

Please note the following

- all C&K articles can be found at the supplier Littelfuse
- new standard label formats, incorporating all previously included label data. We encourage you to refer to the attached label samples for further clarification.

If you have any comments or further questions, please contact your Rutronik Account Manager!

Thanks!
