

2507221673 Change IC Country of Origin from Assembly Country to Wafer Fab Country

Bulletin Issue Date: Jul 22, 2025

Effective Date: Jul 22, 2025

Description of Change

Silicon Labs is updating the country of origin (COO) designation for ICs. Going forward, the COO designation will be determined by the country where the wafer was fabricated, replacing the previous classification based on the country of assembly. Additionally, the outer box label will be updated from:

"Assembled in: XX" to "COO: XX"

Please note: Orders printed with a seal date before the PB effective date will retain the original labeling format and will not be reprinted. During this transition, Silicon Labs may ship both old and new labels until the inventory of old labels depletes. For questions or confirmation about COO designations, please contact your Silicon Labs sales representative.

Furthermore, select Harmonized Tariff Schedule (HTS) codes have been revised to better align with current industry standards and customs HTS code designations.

Please be aware that any country code physically printed on a component may refer to the country of assembly and should not be interpreted as the official COO designation for customs or trade purposes. The COO designation indicated on the label will be the designation for international trade documentation per this product bulletin.

Reason for Change

This update is to align with recent changes to and globally recognized definitions for COO designations in the semiconductor industry and brings our HTS classifications into alignment with current industry norms. Due to the regulatory nature of this change the implementation is effective immediately.

Product Identification

Existing Part #

This change impacts all Silicon Labs IC products

Disclaimer

Silicon Labs intends to provide customers with the latest, accurate, and in-depth documentation of all peripherals and modules available for system and software implementers using or intending to use the Silicon Labs products. Characterization data, available modules and peripherals, memory sizes and memory addresses refer to each specific device, and "Typical" parameters provided can and do vary in different applications. Application examples described herein are for illustrative purposes only. Silicon Labs reserves the right to make changes without further notice and limitation to product information, specifications, and descriptions herein, and does not give warranties as to the accuracy or completeness of the included information. Silicon Labs shall have no liability for the consequences of use of the information supplied herein. This document does not imply or express copyright licenses granted hereunder to design or fabricate any integrated circuits. The products are not designed or authorized to be used within any Life Support System without the specific written consent of Silicon Labs. A "Life Support System" is any product or system intended to support or sustain life and/or health, which, if it fails, can be reasonably expected to result in significant personal injury or death. Silicon Labs products are not designed or authorized for military applications. Silicon Labs products shall under no circumstances be used in weapons of mass destruction including (but not limited to) nuclear, biological or chemical weapons, or missiles capable of delivering such weapons.
