

Top performance - low costs

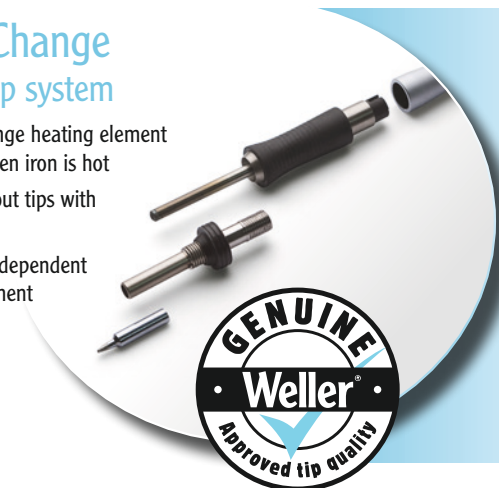

High flexibility for versatile applications - WTP 90 Hybrid Soldering Pencil

- > High performance, 90 W Hybrid soldering pencil
- > Combination between Micropencil for highest performance with best heat transfer and passive tip pencils with very good heat transfer while controlling costs.
- > Quick tip change system similar to active cartridge system
- > Automatic standby mode operates from a sensor in the handle which detects when the device is in use

Quick Tip Change with passive tip system

- > Can quickly exchange heating element and passive tip when iron is hot
- > Can easily switch out tips with knurled nut
- > Tip replacement independent of the heating element
