Last Time Buy (LTB) Notice – WG A0, WG A3, WG 280, WG 480, and WG 660 Series

Dear Valued Customer,

Comus International has been notified by one of its critical raw material suppliers that a key component used in the manufacture of several of our Solid State Relay product families has been officially designated as **End of Life (EOL)**. As a result, the affected products listed below will also enter End of Life once the remaining supply of this component has been exhausted.

Affected Product Series

- WG A0 Series
- WG A3 Series
- WG 280 Series
- WG 480 Series
- WG 660 Series

Unless a suitable alternative for these raw materials can be found and in order to provide our customers with an opportunity to secure future supply, Comus International is initiating a **Last Time Buy (LTB)** program for these product families.

Ordering Process

Customers are encouraged to review their current and future requirements and submit Last Time Buy orders as soon as possible.

Please note the following important conditions:

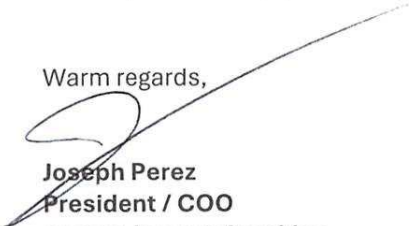

- Availability is dependent upon the remaining inventory allocation of the discontinued raw material.
- **Submission of a purchase order does not guarantee acceptance or fulfillment.**
- Due to the limited availability of the critical component, orders will be reviewed and accepted on a **first-come, first-served** basis.
- Comus International reserves the right to allocate available material based on inventory, manufacturing capacity, and supplier availability.
- Once the remaining component inventory has been depleted, no additional orders can be accepted or manufactured.

Customers will be notified individually regarding order acceptance and any quantity limitations that may apply. Our sales and engineering teams are available to discuss your requirements, evaluate future demand, and determine whether alternative products may be suitable for your application.

We sincerely appreciate your continued business and understanding as we work through this supplier-driven discontinuation.

Should you have any questions, please contact your Comus International sales representative.

Warm regards,

Joseph Perez
President / COO
Comus International Inc
