Detailed description:

To maintain the stability of material as well as supplychain, Everlight will change the outsourced tin plating (bright tin) process to tin plating (matte tin) of the supplied materials. Reduce the use of high-pollution enterprises (such as electroplating plants), and at the same time, the incoming tin-plated brackets have better electroplating stability and bonding properties.

Anticipated (positive and negative) impact on form, fit, function, quality, or reliability:

Only the surface coating of PIN foot changed from bright tin to matte tin, other dimensions remain unchanged

The matte tin quality stability is better than that of bright tin

PAS, RA 1000hr pass /Solderability /Distorting/RA Test

Everlight 2019-2024 production and shipment 2,700KK, no abnormalities from customer feedback
