LFPI260304-1

March 04th, 2026

Dear Valued Customer,

To enhance supply chain resilience and ensure uninterrupted business operations, we are issuing this notification letter to inform you that we have completed the qualification process for an alternative DCB (Direct Copper Bonded) substrate supplier for the remaining part numbers of TO-240 products. This letter serves as an update to LFPI250701, released last July 1st, 2025.

Package type: TO-240 package

The affected parts have been fully qualified in accordance with established performance and reliability criteria. Please be advised that this change does not impact the fit, form, or function of the final products. Product quality and performance remain consistent and fully compliant with existing specifications.

Please refer to the attached product list on the last page for detailed information on the affected products

Form, fit, function changes : No change
Part number changes : None
Effective date : March, 2026

Reliability Test Result

PACKAGE	DEVICE	REL-TEST	CONDITIONS	SAMPLE SIZE	STATUS	RESULT
TO-240	MCC56-16IO1B	TC	100 cycles, -40/+150°C	10	Finished	Completed: Passed reliability

Your Littelfuse representative is available to discuss more specific details with you or answer any questions you may have. Thank you for your understanding and cooperation.

Yours sincerely,

Global Product Marketing Engineer
Littelfuse Asia Sales B.V. PH Branch
