

Wolfspeed® Advance Product/Process Change Notification

PCN Number: PCN-00208 Rev 3

PCN Issue Date: January 14, 2026

PCN Type: Advance

PCN Title

Manufacturing of Discrete I&E Power Devices on 200-mm Wafers at the Mohawk Valley Fabrication (MVF) Facility

Description of the Change

Wolfspeed is in the process of shifting all its chip fabrication from the North Carolina Fabrication (NCF) facility to the state-of-the art 200-mm wafer Mohawk Valley Fabrication (MVF) facility in New York.

After the products are qualified in MVF and the acceptance of the PCN, customers will receive material from either facility until NCF inventory is depleted.

Please note that this is a revision to Advance PCN-00208 that was issued on December 15, 2025 (Details of Rev 3 update can be found on page 6).

Benefit of the Change

The MVF facility offers substantial capacity expansion and world-class automation. This change will drive throughput and high quality to support its customers for various power applications.

Affected Products

Table 1 lists the products affected by this Advance PCN. Any new parts introduced after the publication of this PCN will only be from Mohawk Valley Fabrication (MVF) facility.

Table 1. Affected Products List.

Qualification Plan and Status

The equipment, processes, and products at the MVF facility are being qualified through Wolfspeed’s Process Change Review Board (PCRB) and standard product introduction process. The qualification plan will be developed with the intent that the device performance and reliability for discrete power devices manufactured at MVF sites, including all critical parameters, are well matched to stay within the product acceptance specifications. Data will be made available once qualification tests are completed. Customers are urged to provide any feedback to the qualification plan in writing within 30 days from this PCN issue date.

Anticipated Impact

Qualification and characterization activities are being performed with the goal of ensuring no impact to the form, fit, or function of the products listed in Table 1. The affected part numbers in Table 1 are expected to retain the same datasheets and performance attributes. Any further material changes will be communicated with customers via Major PCNs after qualification reports are completed.

Sample Status

Qualification samples can be made available for the part(s) affected by this change upon a customer request submitted to the contact information listed in Table 3, preferably within 30 days from the issue date of this PCN. Wolfspeed anticipates that qualification samples for an affected product will be available on and after the date set forth as the “Sample Availability Date” for that product in Table 2.

Implementation Date

Table 2 provides the estimated dates for key PCN milestones based on the information available on the date this PCN is issued. Any updates to these dates can be provided by your Wolfspeed contact.

Customer Acknowledgement

Customer is requested to acknowledge this notification within 30 days from its issue date by signing this PCN, scanning it into a pdf file, and emailing the file and any feedback to Wolfspeed at PCN@wolfspeed.com. Note that Wolfspeed references the JEDEC J-STD-046 guideline for its PCNs. In accordance with J-STD-046, this change is deemed acceptable to the customer if no acknowledgement is received within 90 days (Industrial) from the PCN issue date.
